Five digit date code using McCormick four digit date code with a plant designation letter. (Example 1154H 13:58) a) First digit represents the year. if number is five or less, add five. If the number is greater than five, subtract five. The resulting digit would be the last digit of the year. b) Divide the remaining three digits numbers by 50 and add 1 to calculate the month. c) The remainder from the division is the day of the month. d) The letters represent manufacturing information. Based on the final ruling published in 2018, only half of the weekly grains offered in the NSLP and SBP need to meet the whole grain-rich criteria, while the remaining grain items offered must be enriched. With this new ruling, other Mondelēz International products may be added to your school menu as another snack offering. For more information on our additional products—including OREO Cookies, RITZ Crackers and more—or for more information on the products listed above, please contact Karen Christopher at Karen.Christopher@mdlz.com.
